

INTERNET ACCESS

(incl. licensed databases and online resources)
 for non-HU members at public computer
 workstations

Non-HU members who wish to access the Internet from the library's public computer workstations must have a library account. This account needs to be activated the first time they use the Windows terminals.

PLEASE NOTE: WiFi access for non-HU members is generally not possible with a library account.
EXCEPTION: Members of other research institutions should contact the data centre of their respective institution using the keyword EDUROAM.

ACTIVATING AN ACCOUNT

If you have not yet registered with the University Library, please set up a library account first (see rear of leaflet for details).
 Otherwise, proceed as follows:

- 1a Open the Primus Gateway by clicking the **PRIMUS Gateway** button on the desktop of a public computer workstation and log into your user account ("Sign in/My Account", "Non-HU-Members") with your user ID (HUUB...) and password.
- 1b To activate your Windows-Account, change your password in your Primus user account: **Click on your name** (top right) > **My Account** > **Personal Details** > **Change PIN/Password**. Please consider the safety criteria for a strong password. We recommend also to create your personal PIN here which is required for the self-issue machines.
- 2 Log out from Primus. It takes approximately **ten minutes** for your account to be activated for Internet access.
- 3 You can now access the Internet via the button **Windows-Login** („Windows-Anmeldung“) using your new password and your user ID.
